

UnionLabs cloud (AWS)

controller (EC2) · reservation engine
workspace (EFS) · topology from the visualizer

instructions ↓ *gRPC* ↑ *status · heartbeat*

Agent — one per edge node

init: AWS · Docker · RKE2 · Helm
registers with edge ID + token
deploys experiments

creates ↓

experiment pod

Kubernetes container
mounts /workspace

configures ↓

edge devices

Ethernet · USB · GPU
radios · accelerators

← *exposed by permission*

Remote access rides the same cloud–edge path:
pods are never publicly exposed.
